

InvoiceCheck PRO

Automatically check invoices and e-invoices

Local preliminary invoice validation for companies, self-employed professionals and accounting teams - without mandatory cloud processing, directly on your Windows PC.

Local & private

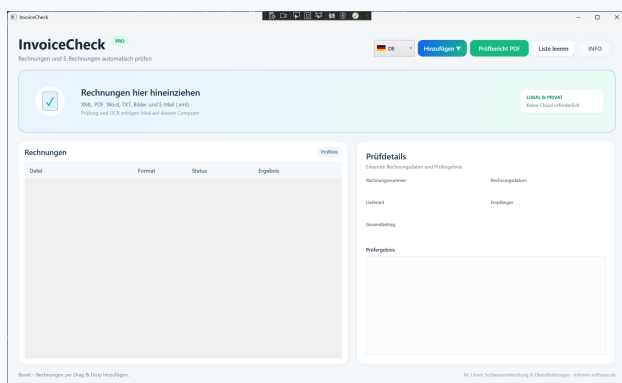

Multilingual

PDF report

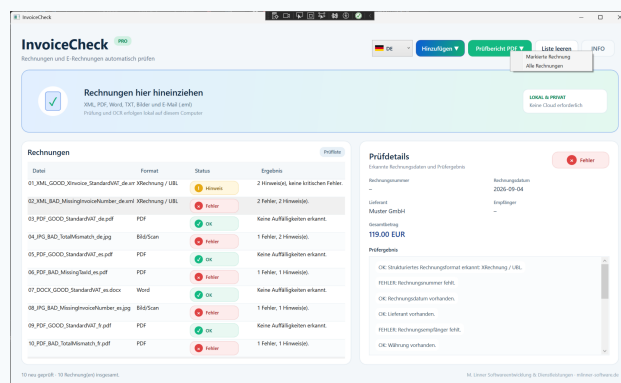

OCR & e-invoices

How InvoiceCheck works

1 Add invoice

2 See results instantly

Simple workflow

Drag & drop or file selection → automatic check → clear status display

What is checked?

- Invoice number, date, supplier and recipient
- Amounts, currency, tax rate and arithmetic plausibility
- XML/XRechnung/UBL, PDF, DOCX, TXT, images and e-mail (.eml)
- OCR for scanned invoices and images

Your benefits at a glance

Save time

Automated preliminary checks instead of manual visual inspection.

Detect errors faster

Missing or implausible information is clearly highlighted.

Work locally

No cloud required - your documents remain on your computer.

Multilingual interface

German, English, Spanish, French and Italian.

Create PDF documentation

Single report or combined report for all loaded invoices.

Many input formats

PDF, XML, DOCX, TXT, images and e-mail files.

Who is InvoiceCheck for?

Companies

Pre-check incoming invoices more efficiently.

Self-employed

More confidence in day-to-day invoice checks.

Accounting

Clear results as support for daily work.

InvoiceCheck Professional

Windows software for local preliminary validation of invoices and e-invoices.

mlinner-software.de · info@mlinner-software.de

InvoiceCheck supports automated preliminary checks. Results do not replace tax or legal advice.
